

# INTRODUCING THE BEST SUPPORT THROUGH CHAT-BOT!

---

Most innovative concept of bringing 1000s of users under one single roof. For any professionals, this is the best way you can ever communicate and ask all your queries. This robotic chat is specially designed making it an interactive session for you. This technology is the most intelligent and crafted according to your needs which you will love and enjoy.

# ISSUES OCCURRING EARLIER

---

Earlier visiting a website and filling up forms for artsing a contact request or any queries was something which was dull and most of your customers exits from there. As they do not wish to indulge into the lengthy process of form fillings. With these forms you were able to generate leads and business and with my innovative concept, you can now keep your potential clients glued to your site

And yes I make this possible for you!

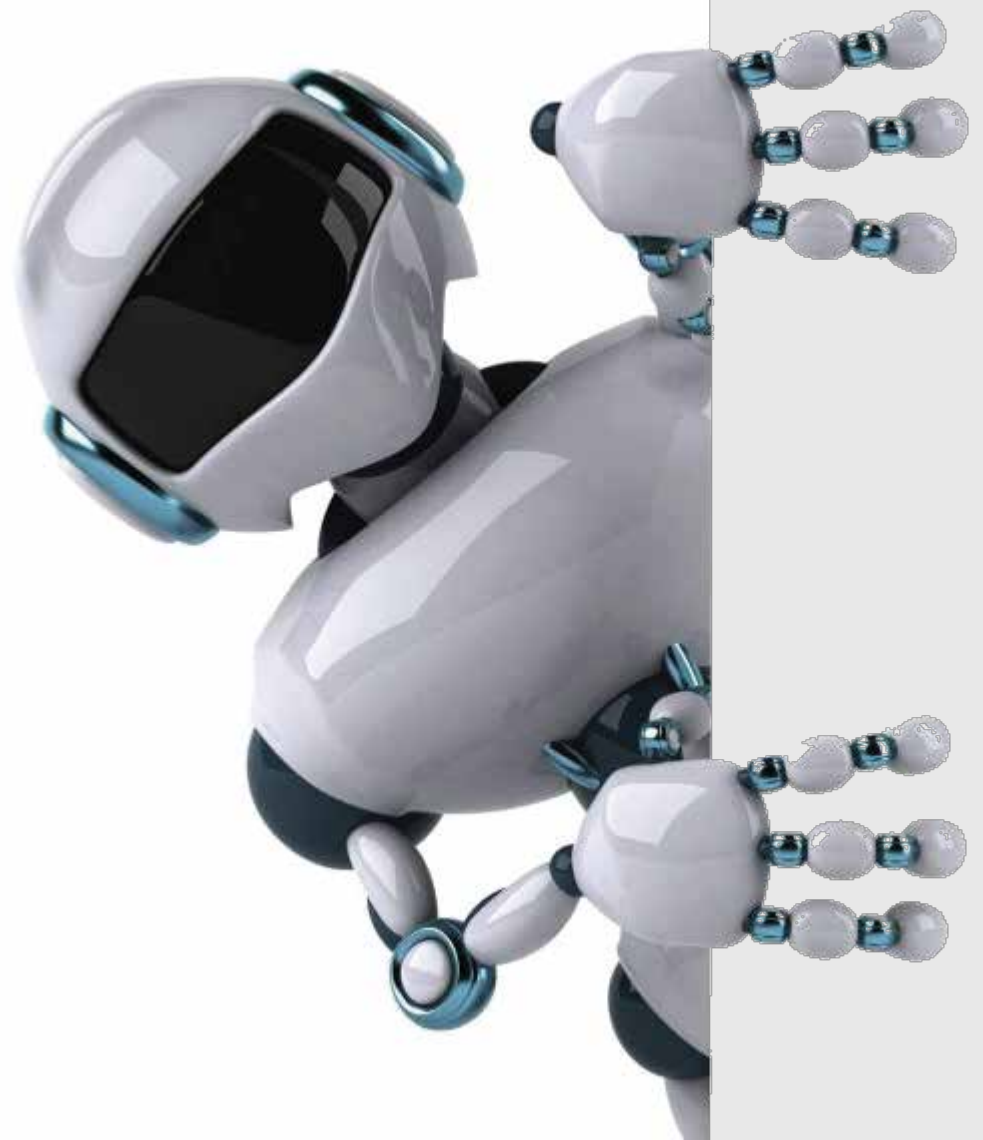

Today I introduce you to the ultimate customizable chat-bot through which users can interact easily and I store the complete database which you have an access to for generating more business.

# ULTIMATE CHALLENGE

---

The challenge which I faced was compiling a fully-customizable chat-bot which generates for your customers. Providing options and making it complete user-friendly. So that it can be integrated in any platform.

# THE ULTIMATE BREAKTHROUGH!

---

Earlier form filling was something which customers denied or ignored doing. This way you were losing potential leads. It was something which was not customer engaging. Even if you had chat support there had to be someone behind the desk 24/7 attending to the customer queries.

I specialize in creating a perfect client platform providing the most professional set up. Automatic questions would pop up for the client to answer and that too with simple options which they can choose from. Creating login/sign up option which would be filled by the client. A single platform which can be used by 1000s of users so there are no limits of interactions and is completely customer-centric.

The questions can be altered or changed or even be added by you whenever you want. The User interface is completely customizable. Icons can be changed, even with the fonts and colors and many more. I use a complete non-NLP based platform.

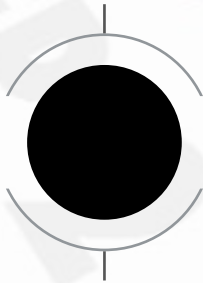

# STAGES

## CREATIVE PROCESS

---

There are the various features in Chat Bot which can really help you in business & these are what I give you

### STAGE 1

Single platform with 1000s of users.

### STAGE 2

Automatic questions will pop up for customers to fill. All the data and personal information of the client is stored in the backend of your database.

### STAGE 3

Complete customizable User-interface.

### STAGE 4

For any issue which is faced by your customer ticket-based solution is provided.

# WHY CHOOSE ME?

---

The following are the ways I benefit you:

- | Intelligent robotic chat-bot
- | All solution in single platform
- | Add services available benefiting both you and your business.
- | Automated question formations with options making it interactive for your customer
- | Potential leads, database storing capability
- | Customizable user interface
- | Drag and drop options with filters available
- | No recruiting anyone else to attend to clients from the back-end.
- | Complete registration form available
- | Ticket-based solution for any issues faced by customers
- | Analytical reporting as the bot automatically analyses the total data and the users

*“Always think outside the box and embrace opportunities that appear, wherever they might be.”*
